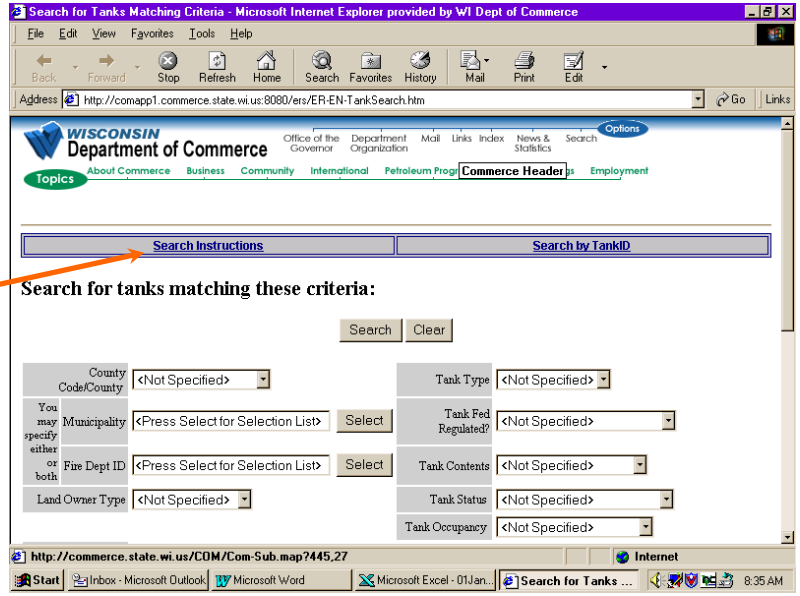
DATCP Internet Tank Search Application

For web page: http://dvmwapps.wi.gov/ER_Tanks/ER-EN-TankSearch.htm

The display at the right shows the web page that allows an individual to conduct a search of the DATCP Storage Tank Database. The storage tank database includes both underground and aboveground tanks that are required by the SPS 310 Code to be registered with DATCP. The database reflects tanks that have been registered. If your search does not produce a tank, this does not guarantee that a tank does not exist on the property. Some tanks, such as heating fuel tanks in the basement of homes are not required to be registered. Some tanks, while required to be registered, have not been registered and therefore will not appear on the database.

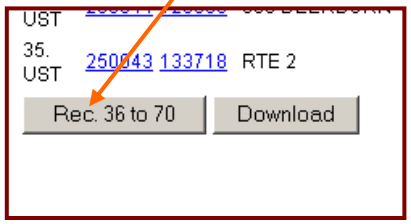


If you are performing a search for the first time, please refer to the Search Instructions.

The search time as well as the length of the search report corresponds with the amount of data being searched. Searches should be narrowed as much as possible. If you are looking for tank information relating to a specific facility the search should be narrowed to: County, Municipality, Tank Type and Address. Current day addresses may be different then past addresses and many tanks had been registered by post office box number (P.O Box.) or Rural Routes that no longer exist. If the search by address does not produce results perform a general municipality search to obtain a list of tanks to screen such as that displayed directly below. Another option is by County (do not enter Municipality).

The notation in the upper left corner of the Search Results confirms the search parameters.

Below the notation is the number of tanks that the search obtained. The page displays 36 tanks on the screen, so you will have to click the button at the bottom of the page to take you to the next group of tanks



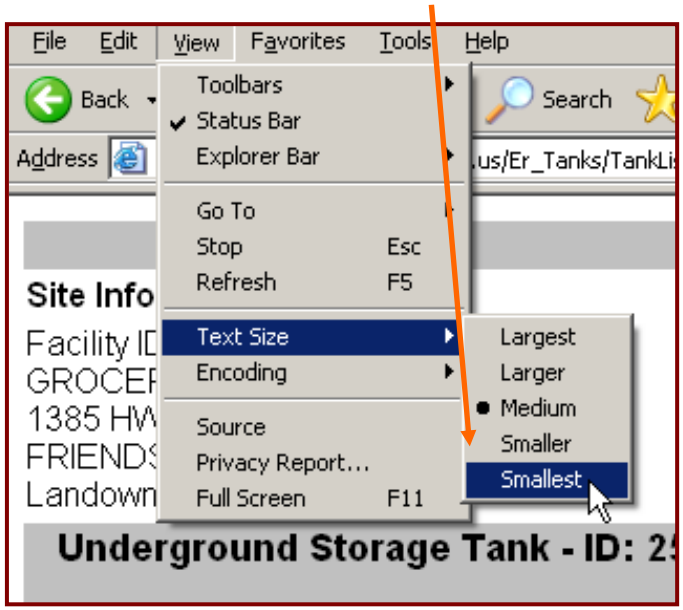
County Code = 01
Municipality = FRIENDSHIP
Tank type = UST

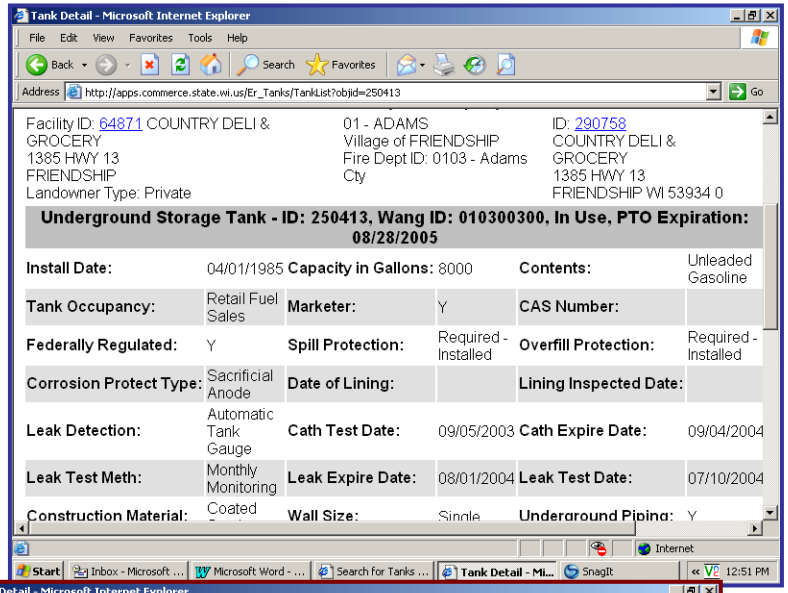
Number of matching records: 125

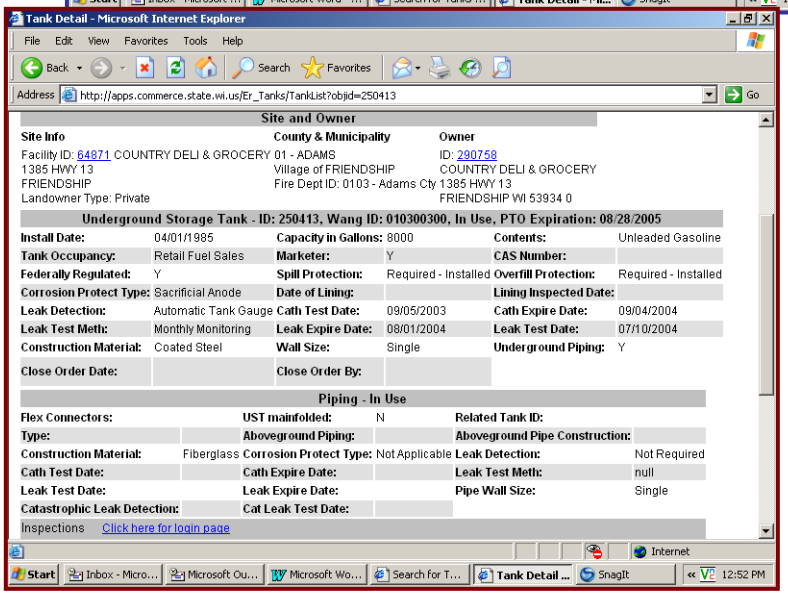
Type	ID	Facility ID	Address	Status	Contents	Size (gals)	Cust ID	Owner
County: ADAMS, FDID: 0101 - Friendship, Municipality: VILLAGE OF FRIENDSHIP								
1. UST	6270	3212	510 S MAIN ST	Closed/Removed	Leaded Gasoline	1000	265030	ROBERT TRZESNIAK
2. UST	6235	3203	402 MAIN ST	Closed/Removed	Fuel Oil	2000	275477	ADAMS COUNTY HWY DEPT - C/O ADAMS COUNTY TREASURER
3. UST	250028	3203	402 MAIN ST	Closed/Removed	Fuel Oil	2000	275477	ADAMS COUNTY HWY DEPT - C/O ADAMS COUNTY TREASURER
4. UST	250082	50579	402 MAIN ST	Closed/Removed	Unleaded Gasoline	10000	275477	ADAMS COUNTY HWY DEPT - C/O ADAMS COUNTY TREASURER
5. UST	250029	54077	2286 PINE DR	Closed/Removed	Unknown	500	279419	ROBERT MCGOWAN
6. UST	250045	54387	1166 CHICAGO LN	In Use	Unleaded Gasoline	500	279798	ARTHUR FOWLER
7. UST	250040	54874	205 W 2ND ST	Closed/Removed	Empty	300	280363	AUGUST KLEIN

The screen and font display are dependent upon your browser setting. The smaller the text setting, the more information displayed on the screen without additional scrolling. This may also impact the printer cutting off the page and displaying the width of text on two pages. This can be remedied by changing the print setting to “landscape” and/or changing the text setting on your browser. Changing the text setting of the browser is described in the next paragraph.

The display to the right has a browser text setting at “medium.” To configure text/font size so that all information is shown on the screen and the contents of the Tank Detail list is printed on one page select “View” – “Text Size” – “Smallest”

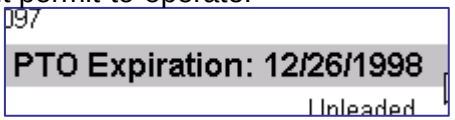


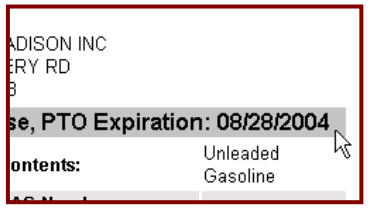




The screen displayed to the right is now more compact and has the text displayed in rows. This should also print with all the screen image width printed on one side of a sheet of paper

The Internet tank search application includes the Permit-To-Operate (PTO) expiration date for those USTs requiring a PTO. If the date reflected on the tank detail screen is previous to the date that you are conducting the inquiry, the tank does not have a valid permit permit-to-operate.





The Internet tank search application also includes a reference to the annual inspection status as recorded in the Internet Inspection Reporting Application (IIRA). Since the IIRA was initiated for the state 2004 fiscal year, the reference will be from FY 2004 inspections (July 1, 2003) and forward.

The reference includes the IIRA transaction number for the respective year. The "Type" of inspection references "AN" and "SA" for DATCP inspector and "LP" for LPO (contract) inspector. The reference also includes the inspection status. If the inspection is closed (completed with no pending enforcement issues) the status is "CLOS" and the date that the information was entered into the IIRA.

Trans ID	Type	Status	Date	Fiscal Yr
914572	AN	CLOS	09/08/2003	2004

Pending enforcement actions are reflected in a "Status" such as order – "ORDR", red-tag – "REDT", and referred to legal – "RLEG."

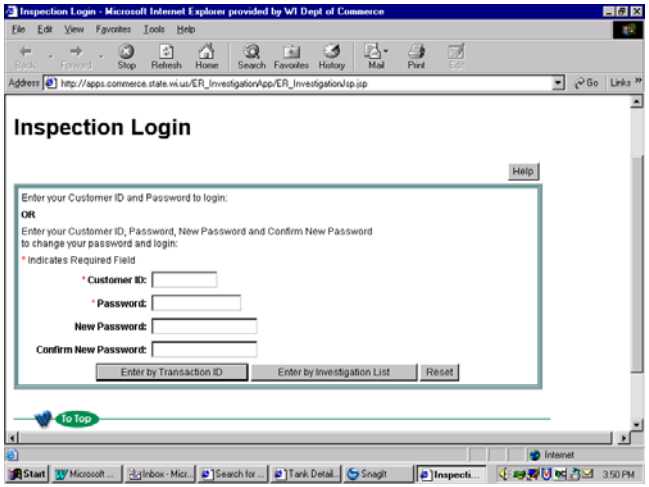
Trans ID	Type	Status	Date	Fiscal
914424	AN	ORDR	04/19/2004	2004

Trans ID	Type	Status
913198	AN	REDT

Tanks that are not subject to annual inspections are reflected as "No inspections. "

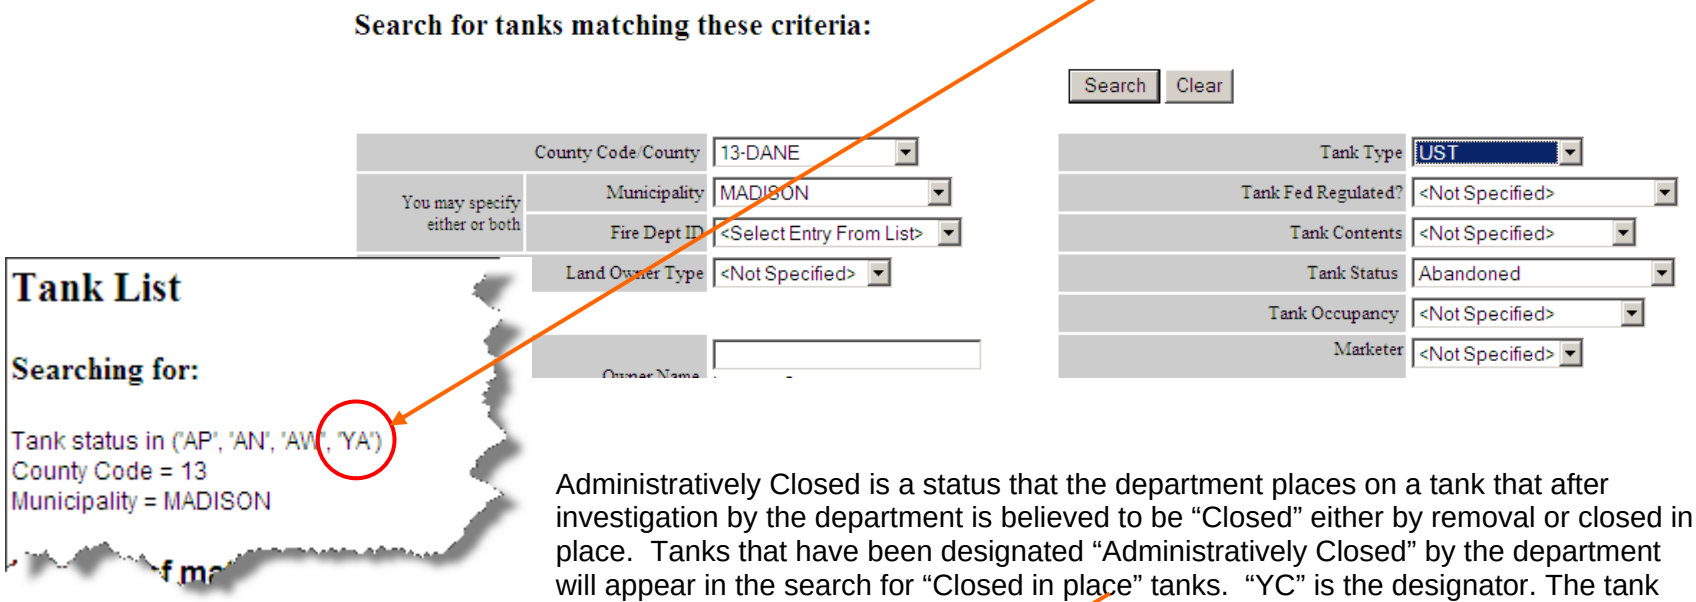
Trans ID	Type
** No inspections for this tank **	

DATCP assigned tank inspectors may go directly to the IIRA Inspection Log-In screen from the Internet Search Application.

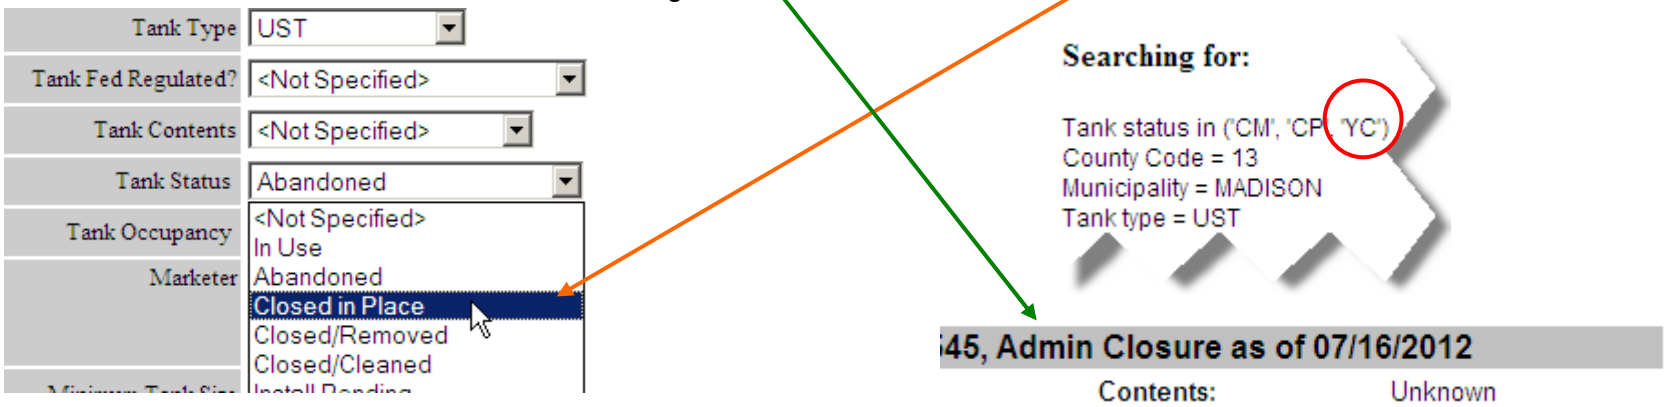


“Administrative” status designations

The department is occasionally presented with situations where the property owner has not voluntarily updated the status of the tank on the property. This situation typically occurs for tanks on the property that are no longer in use; or where there is a claim or suspicion the tank has been removed or closed-in-place, but no documentation to support the claim.
Administrative Abandon is a status that the department places on a tank that is obviously not in use, does not meet the “Temporarily-Out of-Service status and has not been legally closed (removed or closed-in place). Tanks that have been designated “Administratively Abandon” by the department will appear in the search for “Abandon” tanks. “YA” is the designator.

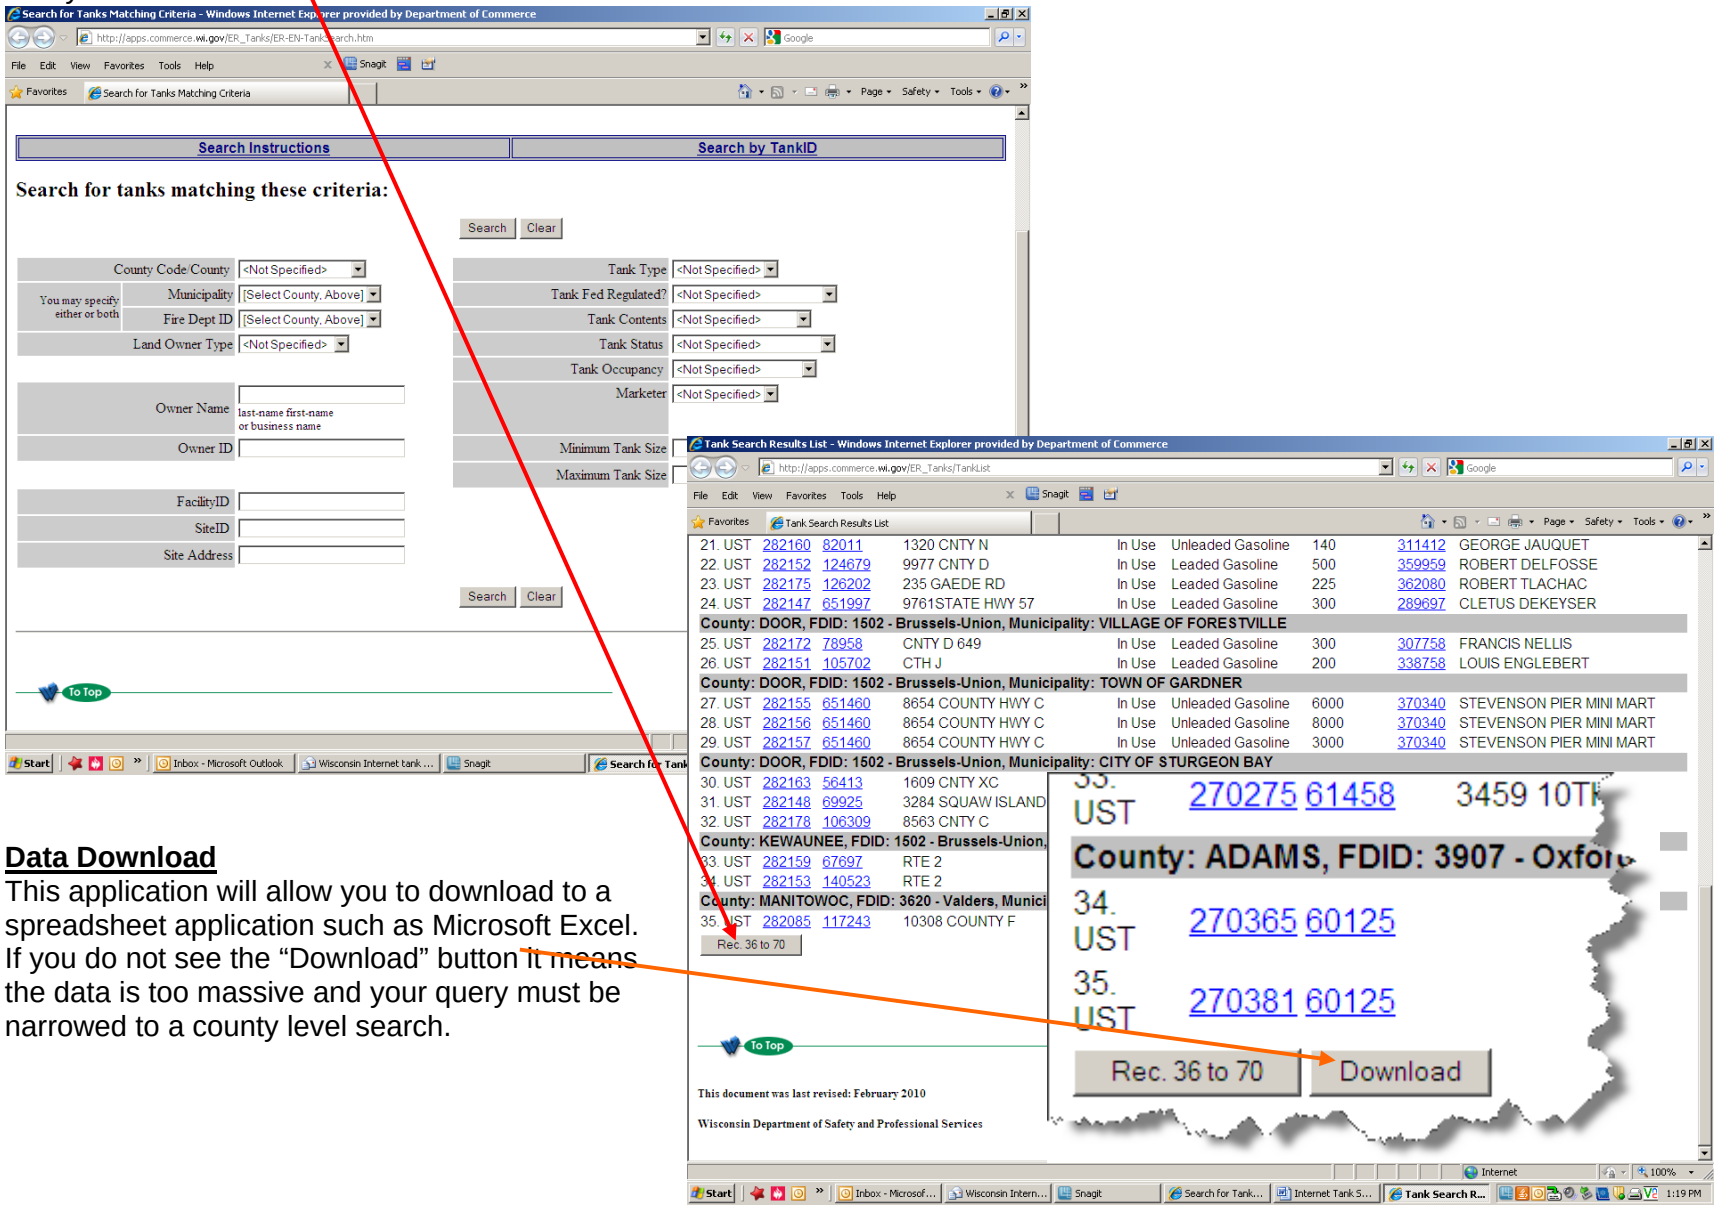


Administratively Closed is a status that the department places on a tank that after investigation by the department is believed to be “Closed” either by removal or closed in place. Tanks that have been designated “Administratively Closed” by the department will appear in the search for “Closed in place” tanks. “YC” is the designator. The tank heading ribbon will indicate the status.



Internet Tank Search Data Download

The screen print below is the web page that is used for a general geographic search. The search must be either by underground tank or aboveground tank; you cannot obtain both populations in one search. The search screen exhibits 36 tanks at a time, with the ability to advance in 36 tank increments.



Data Download

This application will allow you to download to a spreadsheet application such as Microsoft Excel. If you do not see the "Download" button it means the data is too massive and your query must be narrowed to a county level search.
